

Change Notice

SK Series

Change to Color of Disposable Boot for SK

Type of Change:

- Engineering Part Number
- Product Appearance

The SK Series process sealed keylocks will have a change to the disposable boot that is supplied as a standard accessory with the switch. The boot color will change from clear to black. This change will effect both standard and custom products for this series. The part numbers in the table below will be effected by this modification.

SK Part Numbers Effected by Change of Boot Color			
SK12AG13	SK12AG30	SK12BG13	SK12BG30
SK14DG13	SK14DG30	SK14EG13	SK14EG30
SK15BG13	SK15BG30		
SK22AG13	SK22AG30	SK22BG13	SK22BG30
SK24DG13	SK24DG30	SK24EG13	SK24EG30
SK25BG13	SK25BG30		

Before Change	After Change
Clear Polyvinyl Chloride	Black Polyvinyl Chloride

The boot provides protection from automated soldering and the cleaning process. Attach the boot without the key installed in the switch. The boot is not reusable; discard after using.

Notes

There are no changes to the boots' dimensions or material. Contact the factory if more details are needed.

Effective Date

Changes to the SK Series keylocks disposable boot will be effective October 2014.
