

# Standards & Approvals

## Underwriters Laboratories Inc.

Find certifications at [www.ul.com](http://www.ul.com)

File No. E44145

Class Description:

Switches, Special Use – Component. Switches are supplied without marking unless specified. See General Specifications page of each series for ordering instructions.

## Underwriters Laboratories Inc.

Find certifications at [www.ul.com](http://www.ul.com)

File No. E44145

Class Description:

Switches, Special Use – Certified for Canada. Switches are supplied without marking unless specified. See General Specifications page of each series for ordering instructions.

## Canadian Standards Association

Online at

[www.csa-international.org](http://www.csa-international.org)

File No. 023535\_0\_000

Class No. 6241-10; Class Description:

C22.2 No. 55: Switches-Snap-Special Use. Switches are supplied without marking unless specified. See General Specifications page of each series for ordering instructions.

UL, cULus recognized & CSA certified only when ordered with marking on the switch.

See details regarding specific options in each switch section.

## ISO (International Organization for Standardization)

ISO 9001	ISO 14001
<p>ISO 9000 is a set of international standards on quality management and quality assurance. It is not a set of product specifications but requirements for building a quality system with documented and repeatable procedures.</p> <p>NKK has received the certificate of registration for the ISO 9001 standard, which is for business operations that design, produce, install, and service products.</p>	<p>ISO 14000 is a new series of voluntary international standards governing environmental management. ISO 14001 is the first of some 20 standards to be developed.</p> <p>NKK, being a corporation mindful of environmental concerns, has obtained a certificate of registration for ISO 14001. This standard seeks to balance socio-economic and business needs with support of environmental protection and pollution prevention within reach of businesses large and small.</p>

## IP Code for Degrees of Protection Provided by Enclosures

<p>The IP code is part of the IEC60529 (International Organization for Standardization) standard recommending the degree of protection of enclosures for low-voltage switch gear; specifically, concerned with protection of persons against contact with live or moving parts and the prevention of ingress of solid foreign bodies and liquid.</p> <p>The IP code is an industrial specification used internationally and is similar to the NEMA standard.</p>	<p><b>IP60</b> dust tight but not protected from water.</p> <p><b>IP65</b> dust tight and protected against water jets.</p> <p><b>IP67</b> dust tight and protected against effects of temporary immersion.</p>
