# P Series

## Changes for P Toggles with Large Bat Lever

Type of Change:

- Engineering     Part Number  
 Product         Appearance

The P Series toggles with 12mm bushings and large bat levers (code B) will undergo changes to the levers. In order to maintain VDE approval, a white cap will be assembled onto the lever. This modification will apply to all standard and custom P toggles with the large bushing and bat lever. The following table illustrates differences before and after the change, and effected standard parts are listed below.

Changes for P Toggles with 12mm Bushing & Large Bat Lever

Change to P Toggles	
Before Change	After Change
<p>Example: P2012B</p>	<p>P2012B with AT406B Cap</p> <p>Material: Polyvinyl Chloride</p> <p>Color: White</p>

Part Numbers Effected by Change					
P2011B	P2012B	P2013B	P2021B	P2022B	P2023B
P2011BP	P2012BP	P2013BP	P2021BP	P2022BP	P2023BP
P2011BZ	P2012BZ	P2013BZ	P2021BZ	P2022BZ	P2023BZ

### Notes

- The purpose of this change is to retain VDE approval. By installing the AT406B cap, P Toggles with the large levers maintain the VDE standard, but will lose UL and CSA recognition. Without the addition of the cap, the switches would lose the VDE approval status (UL and CSA approvals would not be effected). However, the switches will be available without the addition of the cap.
- There are no additional changes to external dimensions or specifications other than what is shown above.
- Refer to Change Notice 296-A for additional information.
- Contact the factory if further details are needed.

### Effective Date

Changes to P Series Toggles with large bat levers (code B) will be effective May 2017.

## Changes for P Toggles with Large Bat Lever

The P Series toggles with large bat levers and 12mm bushings (code B) are not UL and CSA recognized. For this reason, the code B type switches with UL and CSA markings will be discontinued. Without the addition of the cap (AT406B), the switches will be available but will not be approved for markings.

P Series toggles with the white capped column and 12mm bushing (code D) will be available and approved for VDE, UL and CSA.

The following table displays the discontinued part numbers. Refer to Change Notice 296-A for the new Ordering Table.

<b>P Toggles Discontinued Part Numbers</b>
