

Change Notice

FT Series

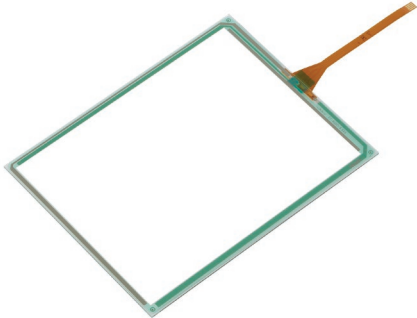

Changes to ITO Film for FT Series Analog Resistive Touch Screens

Type of Change:

- Engineering Part Number
- Product Appearance

FT Series Touch Screens will be undergoing changes to the ITO film (top electrode). This revision will apply to the four-wire analog resistive touch screens, the four-wire analog resistive touch screens with FPC tails, and the five-wire analog resistive touch screens, both standard and custom models. The hardness of the film, previously 2H, will be changing to 3H. Details are highlighted on the following table.

The effected standard part numbers are displayed on page 2.

The ITO Film for FT Series Touch Screens will be Changing

Cross Section View of Touch Screen	Before Change	After Change
	<p>Surface Hardness: 2H (JIS K 5600)</p>	<p>Surface Hardness: 3H (JIS K 5400)</p>

Notes

This change does not impact the specifications or dimensions of FT Series Touch Screens. Contact information is below if more details are needed.

Effective Date

Changes for the ITO film for FT Series Analog Resistive Touch Screens will be effective November 2026. However, the date may be subject to change depending on inventory of the products.
