

# KP SERIES ILLUMINATED PUSHBUTTONS

# KP Series Compact Illuminated Pushbuttons

Illuminated pushbuttons with impressive operability and highly visible, vibrant colors

# The KP Series Meets Diverse Application Requirements

Uniquely designed actuation guide administers positive indication of circuit transfer with smooth and silent operation

Illumination status of the cap can be viewed from any angle

One switch can change and manage the emitted color of multiple switches

Flexible design highlighted with numerous cap styles and sizes

# KP Series - Three Outstanding Features

Utilizes a unique internal mechanism with a patented structure

- ✓ **Choice of smooth, silent actuation or crisp, tactile feel**

Outstanding durability - ideal for frequently used equipment

- ✓ **Reliable, long life of 5,000,000 operations minimum**

Full illumination provides status recognition from any side

- ✓ **Illuminates full spectrum of colors with RGB LED**

# Smooth and Reliable Operation and Unique Internal Structure

- Smooth, silent operation
- Long life of 5,000,000 operations minimum
- Choices of tactile, nontactile or tactile/audible actuation
- Flat, sculptured or home key square caps in three common sizes for design flexibility

# High Reliability and Long Life of 5,000,000 Operations

Gold-plated twin contact mechanism

Provides dependability and stable contact over an extended period of time.

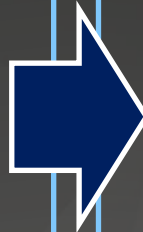

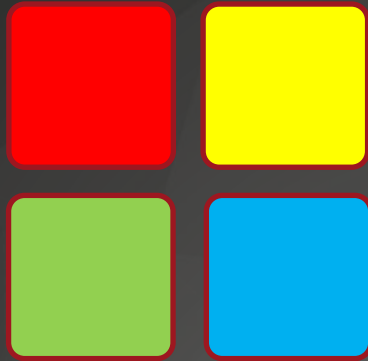

# Change the Emission Color with One Switch and Select the Desired Color

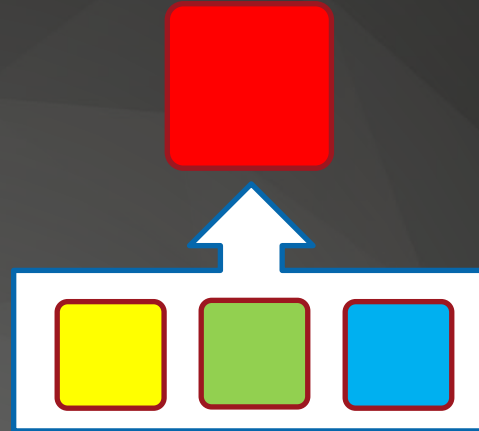

- Create limitless colors with white and any neutral color by combining it with the RGB LED.
- Many colors can be displayed using one switch, enabling the management of several switch functions to be handled with one switch, integrating efficiency and economy.

# KP Series Benefits Board Design

Switch mounting space is increasingly consumed as more status displays are required

Using KP Series enables displaying multiple statuses with one switch

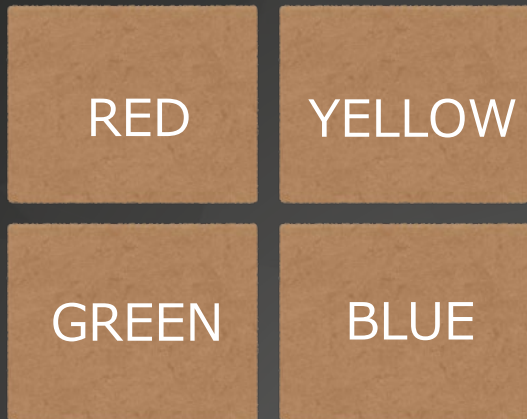

Color changes are dependent on the state

# Simplification of Parts Management

BEFORE: Inventory management  
that involved each color

NOW: Inventory management is  
easier, more convenient and space  
conserving with one switch

*No need to change the models even if there is color change*
