## Change to Label for CKM & CKL Keylocks

| Тур | be of Change: |             |
|-----|---------------|-------------|
|     | Engineering   | Part Number |

☐ Product

The CK Series high security keylocks will have a change to the identification label on the switch bodies to include the new logo. The change will effect all models, both standard and custom. The following table illustrates the differences before and after the modification, and the standard part numbers effected by the change.

CKM Keylock Before Label Change

| Part Numbers                     | CKM Label Before Change     | CKM Label After Change |                         |                        |
|----------------------------------|-----------------------------|------------------------|-------------------------|------------------------|
| CKM12AFW01                       |                             |                        |                         |                        |
| CKM12ATW01 CKM12BFW01 CKM12BTW01 | CK-M12A MKK nikkai PATENTED | CK-M12A DICIC          |                         |                        |
|                                  |                             |                        | CKM13EFW01              |                        |
